

FEATURE SUMMARY

Measured Ball And Club Data, Fast

Meet APOGEE - the newest camera-based Launch Monitor from TruGolf.

APOGEE is a launch monitor that measures Ball and Club data. Built with a new array of vision algorithms called INSTANT IMPACT, the system does not require marked balls or clubs.

INSTANT IMPACT and APOGEE's onboard processor provides a lag-free gameplay experience, erasing any gap between ball-strike and simulated flight.

Seeing Is Believing

View, re-view, scrutinize, and brag about every shot with APOGEE'S Point of Impact interface. Point of Impact (POI) provides a slow-motion, scrubbable, video playback of your club's action through the ball.

You Do All The Talking. APOGEE'S Got The Rest.

The "Hey APOGEE!" Voice command allows users to navigate gameplay and adjust settings inside E6 CONNECT. Less time on the computer, more time for practice swings.

You can ask APOGEE to help you read a putt, show you the trouble around that sharp dog-leg, change the weather to something a bit more dramatic for the tie-breaker, or tee up a breakfast ball... again.

FEATURE SUMMARY

FEATURE SUMMARY

APOGEE Control Center

APOGEE was designed to maximize accuracy, and minimize work. The APOGEE control center (ACC) contains a diagnostic dashboard, an automatic self-calibration procedure, and intuitive troubleshooting tools.

APOGEE intuitively and immediately connects to your computer, and dynamic LEDs clearly indicate device and connection status.

A single user can easily manage installation, from unboxing to, "Hey APOGEE. Show me my scorecard."

We made APOGEE to be the easiest-to-own Launch Monitor on the planet. The APOGEE Control Center (ACC) gives users the most advanced and user-friendly device management tools available on the market.

- The Calibration Wizard automates calibration and makes set up easy
- Firmware Update Control
- Quick Reboots
- Easy Factory Reset
- User Preference Dashboard
- Detailed Device Status and Diagnosis. THE ACC shows live reads on connection status, internal temperature, and more.
- The ACC connects directly to our support department. Users can send data logs to TruGolf Support, stamped with the owner's contact information.

Play It As It Lies

APOGEE uses an automatic Laser Indicator to draw an 8"x10" Tee Box for players before every shot. The Laser disappears as soon as the ball is at rest in a valid hitting location, demonstrating that APOGEE is ready to capture the shot.

Visual confirmation that users have positioned each shot in a readable location minimizes frustrating do-overs or uncaptured shots.

Mental Game

Device-side processing gives E6 CONNECT all the space it needs to play its best game—smooth, fast and fun.

Thanks to APOGEE's high IQ, users can now connect to their device via Direct Network Connection (CAT6).

Physical Game

- Standard 6-Month Limited Manufacturer's Warranty
- Each APOGEE system is designed, manufactured, and stress-tested in the USA.
- APOGEE protects its tech with a rugged bezel and an angled, easily replaceable faceplate.

Industry Standard Software Included

E6 CONNECT is the industry-standard simulation software for a reason. We recreate each of our courses with an eye for detail and an unmatched passion for all the places that make the greatest game great. The E6 Course Library is a living project, one that's constantly expanding, acting as an open invitation for users to discover and immerse themselves in new golf destinations alongside our team of Professional Golf Nerds (PGNs).

E6 CONNECT proudly showcases:

- 90+ World-Class Golf Courses
- 4 Unique Driving Ranges
- 13 Short Game Ranges
- 16 Mini Games
- 8 Modes of Play
- Unlimited Player Profiles and Online Statistic Tracking
- League Management Tools
